HR Attrition Dashboard Report

1. Introduction

The Coffee Shop Sales Dashboard is an Excel-based data analysis project designed to evaluate and visualize the sales performance of a coffee shop. In today's data-driven environment, businesses rely on analytical tools like Microsoft Excel to transform raw data into meaningful insights.

This project converts raw transactional data into an interactive and visually appealing dashboard using Excel features such as Pivot Tables, Charts, and Slicers. It highlights key performance indicators (KPIs) including total transactions, revenue, profit, and quantity sold.

The primary objective of this project is to simplify complex datasets and support data-driven decision-making through effective visualization and analysis.

2. Objectives

- To analyze overall sales performance using key metrics
- To calculate total transactions, quantity sold, revenue, and profit
- To identify top-performing product categories
- To analyze monthly and yearly sales trends
- To evaluate city-wise revenue performance
- To examine weekday-wise customer purchasing patterns

3. Dataset Description

- Transaction ID
- Date (Year, Month, Weekday)
- Product Category (Snacks, Desserts, Tea, Coffee, etc.)
- Quantity Sold
- Revenue and Profit
- City (Austin, Chicago, Los Angeles, New York, Seattle)

This structured dataset enables multi-dimensional analysis across time, location, and product categories.

4. Tools & Technologies

The project was developed using the following tools and techniques in Microsoft Excel:

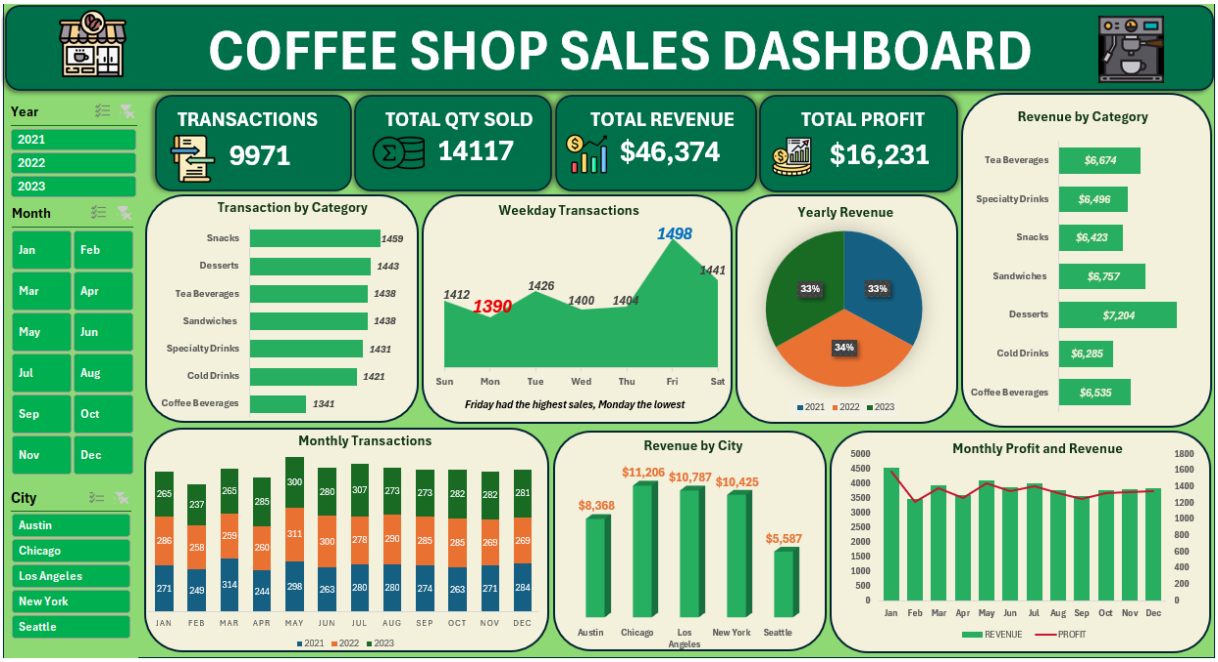
- **Pivot Tables** – for data aggregation and summarization
- **Pivot Charts** – for visual representation of insights
- **Slicers** – for interactive filtering (Year, Month, City)
- **Excel Functions** – such as SUM and COUNT for calculations

5. Dashboard Overview

The dashboard provides a comprehensive overview of sales performance through interactive and dynamic visualizations.

- **Key Performance Indicators (KPIs)**
  - Total Transactions: **9,971**
  - Total Quantity Sold: **14,117**
  - Total Revenue: **$46,374**
  - Total Profit: **$16,231**
  - **Visual Components**
  - **Transaction by Category**: Snacks lead with **1,459 transactions**, while Coffee & Beverages recorded **1,341**
  - **Weekday Transactions**: Friday shows the highest sales (**1,498 transactions**), whereas Monday has the lowest (**1,390**)
  - **Yearly Revenue Distribution**: Revenue is almost evenly distributed across 2021, 2022, and 2023 (~33% each)

- **Revenue by City**: Chicago leads with **$11,206**, followed by Los Angeles (**$10,787**) and New York (**$10,425**)
- **Monthly Transactions**: Transactions remain relatively stable, ranging approximately between **237 and 314 per month**
- **Monthly Revenue & Profit**: Revenue and profit show consistent trends with slight fluctuations across months



6. Key Findings

- The analysis reveals several important insights:
- Friday is the busiest day with **1,498 transactions**, while Monday records the lowest (**1,390**)
- Chicago is the top-performing city, generating approximately **$11,206 in revenue**
- Desserts contribute the highest revenue (**$7,204**), followed by Sandwiches (**$6,757**)
- Cold drinks and coffee beverages also perform consistently, contributing over **$6,000 each**

- Monthly sales remain stable, indicating steady business performance throughout the year
- Revenue distribution across all three years is balanced, with each contributing roughly one-third of total revenue

7. Conclusion

The Coffee Shop Sales Dashboard effectively demonstrates how Microsoft Excel can be used to transform raw data into meaningful business insights. The project provides a clear understanding of sales performance across different dimensions, including time, product categories, and geographic locations.

With total revenue of **$46,374** and profit of **$16,231**, the business shows stable and consistent performance. The dashboard enables stakeholders to quickly identify trends, monitor key metrics, and make informed decisions.

8. Recommendations

Based on the analysis, the following recommendations are suggested:

- Focus on high-performing categories like **Desserts ($7,204)** to maximize revenue
- Introduce promotional strategies on low-performing days such as Monday
- Strengthen operations and marketing strategies in high-performing cities like Chicago
- Maintain consistency in monthly sales through regular monitoring and planning
- Improve performance of lower-selling categories through targeted marketing campaigns
